DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1,6-10 and 13-38 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1,6-10 and 13-38 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. . In amended independent claims applicant has added steps in which an anomaly is detected at a compartment system and data pertaining to said anomaly is sent to the server and then distributed by the server to all compartment systems. Applicants goes on to state that support for this language can be found in paragraph 0016 of the specification after close examination of said paragraph and rest of the specification examiner found no support for the newly claimed method steps.
